

2019 CAPTG Workshop

Monday, September 9, 2019
Sheraton Vancouver Wall Centre, Vancouver, BC
Grand C, Grand Ballroom Level

“Effective Management of Airfield Pavements: Methods and Results”

As airfield pavement maintenance budgets fall at airports across the globe, the pressure on airports to maximize their limited financial resources will only continue to rise. As a result, airport managers, pavement engineers, and contractors in the industry face the difficult task of doing more with less while still ensuring quality workmanship and a safe operating surface. Although this is a daunting challenge, a comprehensive airfield pavement management system is a critical tool for airports to effectively manage maintenance and rehabilitation activities and extend the service life of existing pavements wherever possible.

Attend the workshop to learn current best practices in the industry and how to apply them effectively based on experiences gained from others in the airports community.

Come join us for this unique professional development and networking opportunity!

Registration Details

Cost: \$225 plus GST. Breakfast, lunch, and all coffee breaks are included!
